RETURN TO CIA LIBRARY

25X1X

1. A fuel depot was west of the ZALASZENTGROT (Y 4/D 16) railroad station and south of the loading ramp.
2. The depot had four semi-underground fuel containers, somewhat larger than containers of railroad tank cars. The containers were filled from railroad tank cars.
3. The depot was surrounded by a concrete wall. A 15-foot watchtower, occupied by civilian guards of a party organization, was in the center of the depot.

25X1A Comment:

The capacity of the reported depot seems to be low. The fuel is presumably for civilian consumption.
